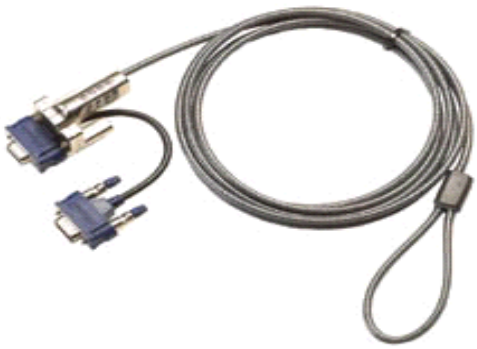
Product Specification Sheet

Targus DEFCON® VPCL

Part #: PA492E



Product Description:

The DEFCON® Video Port Combination Lock (VPCL) is the only system that combines a galvanized steel cable with a high quality 4-digit resettable combination lock and is designed to fit the video port of any desktop/notebook computer. With up to 10,000 user-settable combinations, this keyless security cable lock is hassle-free. Simply secure your computer to an immovable object and your DEFCON® VPCL will deter thieves from trying to steal it. The DEFCON® VPCL utilises a specially designed pass through video cable to allow the use of your monitor/projector while the DEFCON® VPCL is secured. The DEFCON® VPCL's unique serial lock design makes this product truly one of the toughest and strongest locks out in the market place.
